

Case study

Komtar Tower

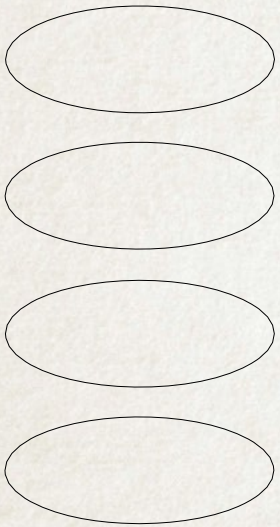

George Town, Penang, Malaysia

incorporating PVT-E & LED
RACELL Triple Energy modules

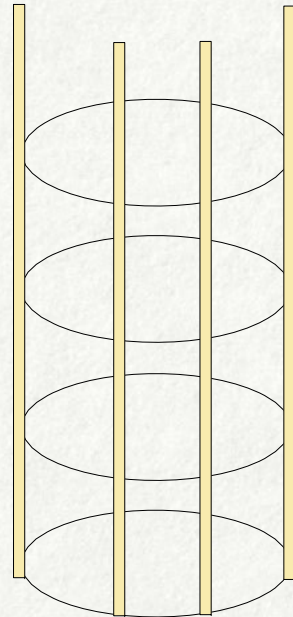

by RACELL & MAP

CONCEPT

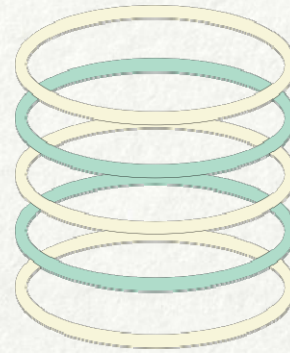

Different function

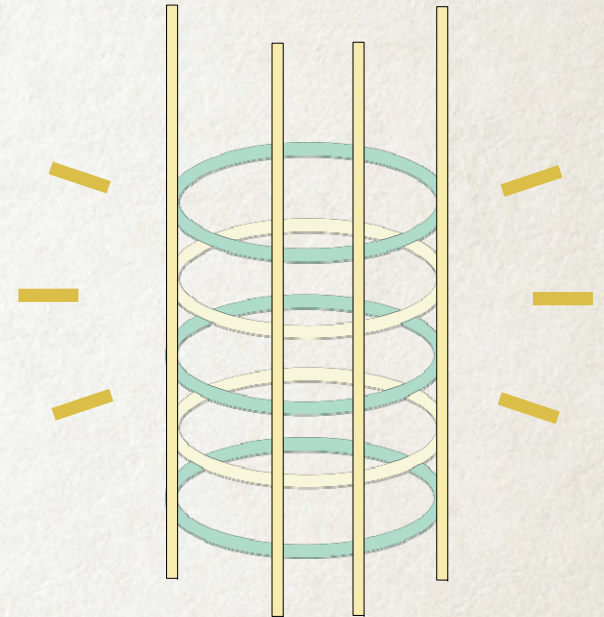

“the tower is not just about urban development but heritage conservation and revitalization of George Town”.

Tower treated like the city. The aim is create a connection between people and functions.

pv panels (coloured?)
around the building.

+ interior lights

The Komtar Tower sees the city and the city sees the Tower.
